(54) ELEMENT SELECTING SYSTEM FOR THREE-DIMENSIONAL MODEL

together the corresponding edge or plane on another three-dimensional view 31 or two-dimensional view 21.

(57) Abstract:

COPYRIGHT: (C)1996,JPO

PURPOSE: To emphasis-display the related edge or plane of a two-dimensional view and a three-dimensional view in accordance with the selection of the edge or plane of the two-dimensional view or the three-dimensional view so that it is displayed plainly what edge or plane is selected in respect of the element selecting system of a three-dimensional model.

CONSTITUTION: This system is constituted so as to be provided with a model display means 4 which displays the two-dimensional view 21 on a window and displays the three-dimensional view 31 on another window, and an element selecting means 5 which emphasis-displays the edge or plane on the designated two-dimensional view 21 or three-dimensional view 31 in accordance with the designation of the arbitrary edge or plane on the two-dimensional view 21 or three-dimensional view 31, and simultaneously, emphasis-displays
